

MUNDA

Textile Lighting Systems

We are a young, dynamic company that has set itself the mission to create something new - a new technology: textile lighting systems. The use of textile lighting systems enables our customers from the automotive industry and many other sectors to develop better products with the help of light: more useful, safer, more beautiful, more individual. We work in a small but steadily growing team of diverse experts with passion, enthusiasm and start-up spirit - but with strong partners behind us. As a joint venture of the traditional companies AUNDE and MENTOR, we combine the know-how of textile design and technology with LED-based lighting technology. Our parent companies form our financial basis and provide infrastructure, sales and production for the components and systems we develop.

For the structural development and the lead of our launch management at our new production site in Pristina / Kosovo and the location of our company in Erkrath, we are looking for a

Launch Manager (m/w/d) – Based in Pristina / Kosovo

You can expect these tasks

- Implementation and industrialization of series projects at plant level
- Transfer of the products and production equipment from the development site to the series production site
- Interface management between production specialists, process and quality engineers and colleagues from the workshop
- Planning of series production and target completion (quality, costs, and deadline)
- Responsibility for timely creation, maintenance, and content of the P-FMEA
- Recalculation of production costs and improvement of the production process
- Coordination and support of the installation and commissioning of machines and systems in coordination with production management and external service providers
- Support in setting up a production site in Eastern Europe

These are your skills

- Successfully completed studies in the field of industrial engineering, mechanical engineering, electrical engineering, or a comparable qualification
- Five years of professional experience in the field of production, industrial engineering, or project management in the automotive industry in combination with strong business knowledge
- Team player with strong organizational and communication skills
- Ability to make decisions and solve problems with a focus on quality and results
- Willingness to travel up to 30% internationally - particularly to Germany and Tunisia
- Written and spoken Albanian and English or Albanian and German. French is an advantage.

That's what we offer you

- An exciting and varied job with personal creative freedom in an environment of two internationally active corporate groups
- Flat hierarchies, short decision-making paths and the opportunity to realise ideas for the future in a highly motivated team
- A secure job with long-term prospects in a successful and dynamically growing technology company
- A permanent, full-time position, intensive training in the special technology of textile lighting systems as well as targeted further training
- A corporate culture characterised by cooperation, commitment and a collegial atmosphere
- Compatibility of career and family through a flexible working time model
- Attractive remuneration

If you like to work independently, enjoy solving manifold tasks and would like to actively shape the future of our young company, we look forward to getting to know you. Please send us your application in english language stating your availability, your salary expectations and the reference no. MU23B07C1, preferably by e-mail to:
